

## DOOR HOLDING MAGNETS

# Door holding magnets GTR070

GTR070R070.01Ex

The door holding magnets are mainly used as holding devices on fire protection doors. They hold them in place when open. Controlled by a fire alarm or smoke protection control panel, they release the closures by interrupting the power supply in the event of a fire hazard.

### Product features:

- ATEX
- Ex II G Ex mb IIC T6/ Ex II2D Ex mb IIIC T85gr C. IP65
- 2,6 W
- 100% ED

| DESCRIPTION       | VALUE                                          |
|-------------------|------------------------------------------------|
| Nominal voltage   | 24 V                                           |
| Duty cycle        | 100 %                                          |
| Power consumption | 1.5 W                                          |
| Holding force     | 1372 N                                         |
| Design            | Marine approved, with base plate, micro switch |
| Connection        | Terminal clamp                                 |
